

Nature's Way
SR

SOIL REMEDIATOR

with select, natural, oil-consuming microbes

Economically, and efficiently remediates soil on site.

Nature's Way SR (Soil Remediator) is an efficient and rapidly acting aqueous product for on-site bioremediation of soil contaminated with unwanted hydrocarbon wastes. SR is formulated to be used in conjunction with Nature's Way Biocatalyst. SR and Biocatalyst work together to penetrate permeable soil and emulsify the contaminating hydrocarbons while inoculating the soil with selected naturally occurring microbes and oxygen. Upon contact, SR reduces VOC's and loosens the hydrocarbon bond to soil particles. This provides for accelerated transformation of polluting hydrocarbons into harmless by-products. Biocatalyst provides a stabilized oxygen source and serves as a carrier for the added nutrients, promoting successful bioremediation at any depth without the use of compressors or other mechanical delivery systems. Also, unlike other bioremediation enhancement products that offer only partial success, SR completely reduces contaminants to the desired level, including non-detect.

- **Faster results with less labor than competing products**
- **Results on-site to non-detect**
- **Eliminates digging and hauling, and long term liabilities**
- **Minimal site disruption. Bioremediate under buildings, structures**
- **Considerable savings compared to other clean-up methods**
- **Technical assistance available from professional staff**
- **Biologically restores property**

PHYSICAL FORM

Liquid - Pale yellow, pleasant scent

PACKAGING

55 gallon plastic drums (208 L.)

5 gallon plastic pail (19.93 L.)

Bulk (275 gallon containers or larger)

AREAS FOR USE

Soil contaminated with petroleum hydrocarbon

TEMPERATURE LIMITS

32 deg F to 120 deg F

SAFETY

pH - approx. 9

Wet Flammability - Non-flammable

Dry Flame Spread - N/A

Threshold Limit Value - Non-toxic

Medical - Refer to MSDS

COVERAGE

TPH under 25,000 - 1/2 gal per cubic yard

TPH over 25,000 - 1 gal per cubic yard

TOOLS FOR APPLICATION

Varies with site requirements

See Supplemental Instructions

LIMITATIONS

Any chemical or condition that will destroy live microbes, will limit bioremediation.

Do not mix with conventional cleaners

WEIGHT

8.34 lbs/liquid gallon (1Kg/L.)

DOT SHIPPING LABEL

Not required

APPLICABLE TEST REQUIREMENTS

As required by governing authority.

The Nature's Way Line of Bioremediation Products are covered by
U.S. Patent number 5,561,059
ALL INGREDIENTS ARE COMPLETELY BIODEGRADABLE
